Subject: RE: OU-3 contamination - as discussed at last Thursday's conference call

Carol,

I don't have the data report yet but expect that soon. Keep reminding me that you need this information.

Thanks,

Steve

Subject: OU-3 contamination - as discussed at last Thursday's conference call

Hi Steve - At last Thursday's conference call, Northrop-Grumman had mentioned that higher than expected concentrations of contamination had been found at the western well of the northernmost transect. Just wondering if you might have a map showing where this contamination was found? Also, it was difficult to hear some of the discussion regarding concentrations and depths. Do you have information on the concentrations and depths of contaminants? Was it mostly TCE?

Thanks,

-Carol-
